1. Applicant's election of species A (Fig. 3) is acknowledged. However, claims 3 and 4, identified by applicant as reading on this species, actually read on Fig. 5 (species C) and are therefore withdrawn by the examiner. In addition, claim 12 is seen to read on Fig. 6 (species D) and therefore is also withdrawn by the examiner. An action on claims 1, 2, 6-11, 13-15, 18 and 19 follows.

2. Claims 9 and 19 are objected to because of the following informalities: the recitation of the "series transistor(s)" lacks clear antecedent basis. Also in claim 9, the parenthetical expressions should be removed. Appropriate correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 6-11, 13-15, 18 and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by any one of Inamori et al, Crampton and Cho et al.

Art Unit: 2816

Note Fig. 2 of Inamori et al, Fig. 5 of Crampton and Fig. 2 of Cho et al. The functional recitation in the above-noted claims is deemed to be inherent in each of the references, and the recitation of RF ports in the claims is deemed to be merely intended use (i.e., using an RF signal with the structure of the claims and the structure of the references) which cannot be relied upon to define over the prior art.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Note Fig. 5 of Adams et al.
